## Introduction

The Cryptocurrency market of today's society is a multi-billion dollar market. Though, it is yet to be accepted by the masses as a tool for every day exchanges, comparable to your standard fiat currency such as the dollar or euro. While currently holding a market share of only 1% in modern day exchange currencies, it is expected to see rapid growth during upcoming years.

We established Bitbeeline(BBL) because we believe in the potential of cryptocurrencies and that through application, corporations may find an easy and efficient way of receiving financing for projects by utilizing what is known as an ICO (Initial Coin Offering). Our vision at BBL is to allow companies to finance their activities as easily and securely as possible by utilizing digital currencies for project development and service development. Currently, we are designing and constantly upgrading a fresh, new platform for cryptocurrency exchanges, trades, and conversions into foreign fiats.

BBL is a highly secure peer to peer decentralized cryptocurrency using the Script POW/POS Algorithm with a sophisticated method of difficulty that re-targets every block. It is in itself a self-regulated financial system which allows owners to earn BBL through Mining,

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

Staking, and Trading. BBL also offers a lending program and referral program which pays the lender a daily dividend on their investments and the user will receive their initial investment back at the end of the loan period.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Bitbeeline – An Overview

If you are looking for a cryptocurrency that is very similar with bitcoin in many technical aspects, you do not need to look any further – Bitbeeline is a digital currency that operates on the internet around the globe, no matter the geographical distance between the sender and receiver. Additionally, the BBL propagates the instant transaction process, with only a few minutes needed for the transfer to take place.

Another important feature of the coin is its decentralized nature, meaning that no one controls its trends, value and transaction flows, existing only as an independent asset that traders can use in a variety of environments, from exchange to gambling and lending. As for the ease of transfers transactions, it is important to note that the coin can be sent anywhere in the world with very low mining fees as the network is not as large as BTC, providing a low-cost environment for all interested parties to work in.

As for the supply, the amount of BBL currently in the market is limited to 28 million coins worldwide, resembling a financial system of deflation, keeping a healthy value for the coin to have according to the demand of the market. Should the said demand raise in the future, so will the value

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

of the coin, with each new trader entering the frame pushing the coin's value up.

The transactions are anonymous as the owners of the transactions cannot be seen even though the transactions themselves can be found online. The address owners are not specified, providing needed privacy for all involved in the transfer.

Lastly, traders and investors alike should be aware that mining operations of the BBL are possible through CPU/GPU equipment.

# Bitbeeline Technical Specifications

BBL Specifications	
Coin Name	Bitbeeline
Algorithm	Scrypt
Ticker	BBL
Total Coins	28 million
Premine	19%
PoS Yearly Interest Rate	10%
PoW Reward	50
Mining	CPU/GPU

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Bitbeeline Features

- Completely anonymous transactions due to the unspecified transfer addresses
- Highly responsive and knowledgeable support team available 24/7
- Not a scam with returns that would imply the fraudulent operations
- Profits are fairly shared with investors through lending and gambling operations
- Transparency of the transactions through blockchain
- 8 levels of referrals, each designed for specific investor's needs
- 4 lending programs available
- Availability of the mining operations
- Large returns from gambling operations
- Social network and website updates of the market and coin
- Exchange available with other cryptocurrencies such as BBL, BTC, BCH , BTG, DASH, LTC, BCC, XVG and others
- Mobile wallet applications

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

- API payment gateways

# The Roadmap of Bitbeeline

- ✓ **Q2. 2017** : Building the Bitbeeline system.
- ✓ **Oct 2017** : Bitbeeline complete construction.
- ✓ **Nov 2017**: Build the community and crowdfund the project, Marketing Campaign, Register for free.
- ✓ **Dec 2017** : ICO Starts. Promote Mining. BBL Block Explorer, Website wallet, Desktop Wallet (Windows, Linux, Mac).
- ✓ **Q3. 2017** : Open lending Bitbeeline, we accept BBL, BTC, BCH, BTG, DASH, BCC, XVG.
- ✓ **Q1. 2018** : Release for market trial. Exchange: BTC-BBL, BBL-BCH, BBL-BTG, BBL-DASH, BBL-LTC, BBL-XVG, BBL-BCC ... Coinexchange.io, Yobit.net and others.
- ✓ **Q2. 2018** : Application of mobile wallet. The launch of online games using BBL as payment method.
- ✓ **Q3 2018** : Beta Platform. Launched Beta platform with key partners.
- ✓ **Q4. 2018** : Partnership with Merchant. API connection for Payment Gateway.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Timetable of Pre-mine Distribution during ICO

On November 15<sup>th</sup> 2017, as an initial volume before the ICO release, 1.2 million BBL is planned to be released to the market with promotions and price discounts to attract traders and investors. The coin is poised to take up a number of features and services to the interested parties through lending, exchange and gambling products that our team offers. The largest part of the bulk will be presented at the beginning of the Initial Coin Offering (ICO) period, with 780,000 BBL released during November 2017.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

The planned price sequence represented by the figure above is constructed as follows :

Price 0.70 USD / Volume 230,000.00 BBL

Price 0.80 USD / Volume 575,000.00 BBL

Price 1.00 USD / Volume 690,000.00 BBL

Price 1.30 USD / Volume 805,000.00 BBL

Refferal bonus 5%

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

Our team reserves the right to change the timetable of the ICO of the coin should unforeseen circumstances occur under which we do not have control over or if the promotion plays out significantly different from the planned sequence. Rest assured since we do hold interests of investors in our regard when planning the promotions and programs.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Additional information about Coin and its Lending

Most of the HYIP programs right now would offer insane lending returns, promising huge daily profits for those investors that wish to put their trust and money to the coins offered. The amount of disappointment would also correspond to that level of a promising start as soon as the operations of those returns have been exposed as a fraud.

Thus, we were looking for a solution that would be profitable for both sides, ours and investors, as we are keen to establish long-term relationships with people around the world while building a new bitcoin in the market. The future of the cryptocurrencies looks bright, a fact that we wish to exploit by offering a lending and coin programs devoid of past issues seen in some more famous altcoins such as BTC, LTC, ETH and others.

Our lending program is based on monthly returns, fixing the price of coins the transaction was agreed upon and thus protecting both sides in the process. The returns on the monthly basis are presented in a separate section and do not exceed 42% of the value invested per month, nor does it fall below 30%.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

Our operations are backed up by investors based in different financial and banking sectors, providing security for the steady supply of coins in the foreseeable future. We have been also contacting various other organizations, proposing different types of agreements and programs, from schools, military and hospitals to charities, eBBLtronic companies, gaming and various other communities.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Our Team

Due to the very nature of cryptocurrencies being decentralized and not controlled by a single entity in the world, we choose to not deliver personal details of our development team and owners public. The reasons for such decision are easy to grasp and we do not wish to hide them from our investors and partners.

To start off, publicly listed companies engaged in digital money exchange operation have been pushed to cut down the privacy for both themselves and for their clients. As we are firm believers that anonymous purchase, sale and lending of coins are what made the BTC and its altcoins so popular in the first place. Respecting your privacy is our main goal and with publicly displayed information about us would signal the regulative bodies to push us towards the strictly controlled environment, where you would be asked to provide your own identity documents, as it is the case in many known exchanges.

Second, the tax implications on our operations would significantly increase the price of the LTC and other services, cut down your return rates, as well as decrease the value of the coins in the foreseeable future due to the potential lack of interest from the cryptocurrency community. By avoiding the said development, which still is our right as a citizens

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

bent on changing the world towards the better place, we are able to provide high-quality services at reasonable prices.

The third is the recent development aimed against the decentralized nature of bitcoin by a number of countries, where any sort of business conduction without a financial license would attract closure of operations and legal actions against the owners of the platform. We do not hold knowledge on what the future will bring for all of us involved in the industry, especially since some countries have taken an aggressive approach towards digital money since they are unable to control it, an example being the US government's closure of few ICO that were deemed as illegal.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Decentralization

Since BBL is decentralized in nature, the ledger of all transactions is available for general public at any given point of time. The said lack of control allows for scalability of the system and provides public access to the blockchain data. The data itself cannot be manipulated by a single or group of parties since the information is encrypted. The encryption of the transactions thus cannot be falsified by us or anyone else, making our ICO available for the wide public eye.

This would allow you, as fellow traders, to look at the records and numbers without the influence of a group of rich people, bent on moving the market towards their own ends. The fair environment is thus guaranteed from the beginning and should you find the BBL ICO ledger inadequate, you would see it miles away before you start trading and investing your own money in it. Suffice to say, we do not plan to simply release the coins and sit tight without any sort of reaction from our side should things go downhill. We do have means and tools to stabilize the market at any given time to ensure the least possible amount of damage for the clients that wish to work with BBL.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Privacy and Security

There are several points about the BBL platform trading that you should be aware of concerning privacy and security.

To start off, all transactions are recorded in the general ledger of the blockchain, meaning that your actions will be visible for the general public's view. The transactions themselves, although containing the trade details, DO NOT hold any of your personal information, as we do not collect the said details from you in the first place. The data visible are concerned with the date of the transaction and its value, while your identity is not mentioned at all.

The only details that would be asked of you are your IP address and an email you use for referral and lending services. Both addresses serve as anti-hacking measures, making sure that you are a person and not a bot created to enter the market and cause havoc all the while. The IP address that we collect from you is not held for any sort of purposes and neither are details recorded in our system but we do advise you to protect your passwords and encrypt your emails and wallets as to avoid unpleasant situations.

As for the security of your investments, we have exerted significant efforts in coding and investment in the safety of the platform, which

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

includes your information and wallet balance. The point can be taken that at the beginning stage the project might not have the popularity of other more famous altcoins but we have nevertheless taken steps to ensure your privacy and security of your coins. Additionally, we are planning to include both hot and cold storage wallets that are secured with multi-signature addresses and two-factor authentication (2FA) as a measure of protection, further securing your funds.

Further information regarding the privacy and safety regulations of the platform can be found at “Terms and Conditions” section of our website. Also, be advised that, upon signing an account at the Bitbeeline platform, you have read and accepted (and will be asked to confirm this as well) the Terms and Conditions of BBL trading platform.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Development Team

The dev team responsible for this platform and coin creation is made of experts in the field, who have been in the industry for quite some time. They know what it means to trade cryptocurrencies and thus possess the required knowledge to make the market suitable for traders while keeping up the high standards of security, ease of transfers and privacy of all parties.

The website and all tools available have been polished according to the market demands and we cannot be more proud of the development team for coming up with a quality product that ensures fair and safe BBL trading.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Our Referral Program

The referral program offered by the BBL team consists of 8 distinctive levels, each designed for specific service need of our customers.

F1	8.50%
F2	4.00%
F3	1.75%
F4	0.75%
F5	0.50%
F6	0.25%
F7	0.125%
F8	0.0625%

The first 6 tiers of the referral program are concerned with regular structure available for general public, while one tier (the top one) will be dedicated for our social media promoters who are to help advertise the BBL. The percentages presented in the table above refer to the interest payments for trade amounts made by the people you have introduced BBL to. The more people you get in, the more money they would be

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

transferring between each other, creating a large referral value for you, earning you higher interest rates as a consequence.

The program acts as an incentive for you to work with the platform and increase the activity of the market by including your friends, family members and coworkers. The more people trade with the BBL, the higher value it will have in the near future. The reward system is not meant to be the core of your business but it can still be viewed as another revenue channel for you. The more you invest, the higher margin you will make while the number of traders would increase to the point where your other activities, such as exchange and lending would increase in scope as well, earning you, even more, money in the process.

As for the top tier applicants, apart from the referred trade amount, as a top promoter of the BBL platform, you are required to create a minimum 3 video on YouTube about BBL-related topics per month to keep the status ongoing. The larger number of people getting inside our platform from your YouTube video, the higher interest rate you gets. The payment is done retrospectively for the premium promoters, meaning that you get part of the interest payment from the referrals of the people you got in the program. And if that is not enough to convince you, we are also offering additional 0.2% on all of your taken-out, personal loans to provide you with further incentive to make awesome videos online.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Our Lending Program

The lending program offered by the BBL platform is in many ways similar to all other cryptocurrency platforms out there. The loans are expressed in BBL, meaning you loan out coins to other investors that have their own personal agenda concerning the BBL investment. The programs are divided according to the amount of BBL you wish to lend and the value of the volume put to loan. The table below exemplifies this:

Lending Amount	Profit	Capital back
\$100.00 - \$999.00	Up to 30%/Month	After 289 days
\$1,000.00 - \$4,999.00	Up to 33%/Month	After 229 days
\$5,000.00 - \$9,999.00	Up to 37%/Month	After 177 days
\$10,000.00 - \$100,000.00	Up to 42%/Month	After 120 days

The interest per month earned represents the total amount gained on a daily basis while the capital back column refers the time needed to gain back the money invested into the loan through interest payments by the borrower.

When you submit loan offer in the platform, the said transaction is then locked by the number of days in which the funds are to be used by the

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

borrower. The day's program is divided into two separate levels, the 199 days and 299 days, with interest paid on the daily basis by your borrower. The large portions of the coins lent are held in cold storage in an offline environment, protected by the multi-sig addresses as a means of safety for your investment.

You also have an option to reinvest the interest earned at any given time, creating a larger amount of profit made throughout the loan period, which would commence a new contract, resetting the days of the loan back to the original number. The loans and interest funds will be credited to your USD balance account, expressed in fiat currency, which you can use to either purchase more coins or lend them in a different loan program or you can withdraw the said money back to your credit/debit card or bank account at your leisure. You will also have an option of converting the earned money to BTCs as well should you deem BBL/BTC trade more profitable at the time.

At the end of the contract, you still have an option of either prolonging the agreement to another 199/299 days or you can withdraw the funds to your personal balance accounts at any point in time.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Gambling and Bitbeeline Card

Apart from referrals and lending platforms, we are also planning to offer gambling and Bitbeeline card services for our clients. The gambling applications shall be developed by the development team in coordination with the experts in the field to offer you a wide range of gambling games where you can put to use your hard-earned coins in another way from your core activities. A variety of casino games would be installed for you to use and the returns would be very hard to simply pass by if you have an interest in such transactions. The bet rates shall be distributed fairly and equally amongst the stakes you put, meaning that your coins will not be “stolen” away from you due to the unrealistic bets against you.

Bitbeeline card would increase your funding flexibility as you would gain cash and online banking purchase methods as additional funding channels of your account. The mobile wallet platform would be connected with the card you would get from us after ordering it at the platform, offering you an instant access to the Bitbeelines at any time of the day.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Bitbeeline Debit card

A BBL coin debit card allows users to spend their crypto-coins anywhere that VISA or MASTERCARD are accepted as a method of payment. You can use the debit card to shop online, swipe at a store, and even to withdraw cash at ATMs worldwide. A BBL coin debit card can be used in any country, as long as there is a "VISA/MASTERCARD accept" sign displayed, and has no hidden fees.

The BBL coin debit card is simply a standard debit card in USD, EUR or GBP, that you can top up really quickly, using crypto-coins. So, if you have a lot of crypto-coins, and would like to spend them easily, this is one way to do that.

BBL coin debit cards are a dream come true for users who have access to various crypto-coins and would like to have the convenience of money on a debit card, but do not have a bank account.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

BBL coin debit card are also becoming more and more popular with people who do not want the hassle of trading their crypto-coins for cash, or moving monney into their bank account before being able to spend that money. By using a BBL coin debit card, you spend your bitcoins directly, without having to exchange them first.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Listings and Exchanges

At the first quarter of 2018, right after the crowdfunding stage, we plan on signing partnership deals with various exchanges to increase the available marketplace for the BBL to grow. The said enlargement will not take place initially as the crowdfunds are needed to further develop the BBL volume needed for such investment at this stage.

The exchanges that we are looking for to work with are Coinexchange.io, Yobit.net and other similar platforms where you can exchange the coins with other cryptocurrencies, such as BTC, DASH, LTC, Ethereum and many others. It is important to use your wallet address should you happen to use the facilities of the exchanges that would sell BBL, as to be able to receive and send BBL between your accounts.

As for the BBL platform listings and exchanges, we would initially offer BBL/USD trade in 2017. Other digital currencies would be gradually added to the trade as the customer base grows, with the emphasis being bitcoin and Ethereum due to their already-large infrastructure. The rates would correspond to the industry averages with the low spread on the exchange rate between the altcoins and BBL. Currently, we do not hold any plans for other fiat currencies other than USD though we might add

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

them should the customer base grow significantly from regions that use currencies other than USD.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Mining

Mining is scheduled to be open for general public at the end of the year 2017 which shall be promoted using social media and other channels of the marketing campaign. It is worthy to note that the mining shall be possible using the CPU/GPU equipment, and the BBL will use the Script Proof-of-Work (PoW) algorithm along with Proof-of-Stake (PoS) for network security.

If you are looking for moderate and cheap mining operations, CPU mining would be the right choice for you, while GPU is more expensive to get and maintain but provide a lot bigger stocks of the coins for the miner.

At any case, we will inform the customer base as soon as the mining operations will be released by providing news feeds and through our marketing campaign efforts.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## How do We stand to Other Similar Programs

There are several important aspects that we wish to address concerning other ICO projects that have been alive and kicking in the last few months. We have taken time to properly research the past efforts, an example being Bitconnect, and their measure their success, pros and cons. We intended to create a platform that would avoid the problems identified in those platforms while providing additional services that would bring more value to our customers.

Hence the reinvestment features for our lending program, which is not available in many other ICO marketplaces and many other services, such as multiple altcoin trade availability, realistic referral, fair gambling chances and attractive loan yield programs. The main point of the services that we offer is that they are designed with long-term sustainability of the marketplace in the mind. We do not wish to make big promises only to fall flat on them as soon as the ICO phase is done. The partnerships we are looking for to establish are with stable exchanges as we wish to make BBL the next bitcoin in its generation.

To be able to reach that goal, the more moderate approach is needed, as the duration of the project is achieved only when all sides are satisfied with the deal. Traders might have lower ROI figures on the paper when

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

compared with other offers in the industry but we assure you, our ROI for you would last LONGER than those of our counterparts. In the long run, the ROI you would reap from investing in our operations will be a lot bigger than if the short-term profit orientation was implemented.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

## Concluding Remarks

Trading with Bitbeeline would grant you a lot of advantages that other ICOs do not possess, from instant transactions to various exchanges services, from different cryptocurrencies offered on the platform to API and security tools. The crux of the project is to provide a private investing environment where traders and investors alike can conduct business with peace of mind.

The trading expenses are very small while numerous channels of revenue streams are offered to the general public. The expected yield to the investments made could be considered as low when compared to other competitors but, as mentioned several times within the white paper, we aim to have a sustainable operation that would last for years to come.

We cannot deny the fact that many reviewers might see us as yet another scam attempt, aimed at taking the funds from unsuspecting investors. At the same time, we will ensure that those claims will be falsified time and time again by completing our planned sequence of action plan while providing a safe environment for all involved with Bitbeeline. Thus, we have implemented various safety measures to protect the wallet balances of the traders while providing reasonable referral and loan returns.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017

What makes the Bitbeeline an opportunity that few enjoy right now? Well, if you are reading this paper, you are definitely a part of the small group of people on this planet that caught the train of progress called “cryptocurrency”, a train that is poised to explode in value within next 5 to 10 years. We deem our business proposal as sustainable and attractive; so if you do decide to participate in our crowdfunding project, you will reap extensive rewards in few months. If you stay with us for a longer period, we guarantee you that your investments will pay off tenfold.

[www.bitbeeline.co](http://www.bitbeeline.co)

November 2017
